Today's Updates?

- Why use Master Safelist Mails?
- Master Safelist Mails is currently monitoring email at 309 websites.
- Worldprofit Workshop - canceled last week
- Newsletter Archive

**Why use Master Safelist Mails?**

Most amateur marketers do not realize **the amount of email traffic that hits their GMail accounts**, and they REALLY do not understand that **Google may actually BOUNCING** or **THROTTLING** the email they receive.

You should only assign email **traffic from 8-10 safelists to any single GMail account.** That means that if you have signed up for 100 safelists, you should have 10 or more Gmail accounts.

Dave Mosher, who owns over 300 safelists, noticed that his mail servers

Secrets of the Big Dogs

100% Direct Pay Commissions.
Automatic Signups & Traffic

were getting bombarded with **Bounce** or **Retry** messages because Gmail accounts for his safelist subscribers were being overloaded. This was not only **slowing down email distribution** but **overrunning disk space** for these errors. Dave had Roger Hoover create Master Safelist Mails, and **offered it FOR FREE** to his safelist subscribers to help them better manage incoming messages, and make it easy to send emails, while providing GMail relief.

Once you select a safelist in MSM **Select Sites**, it is moved over to **My Sites**, where you can store your userid and password for each site. Once the userid and password update is accepted, **you will no longer receive safelist solo ads or credit mails for that site in your Gmail inbox**. These messages can be read from MSM in **View Mails**. **Only admin messages** (very few) will be sent to Gmail.

Your MSM **View Mails** tab allows you to select the site whose messages you wish to view. You will see **only the last 50 messages**, but if you want to see more, you can login to the site to retrieve the rest.

TIP: Rather than clicking randomly for credits as messages enter your inbox, MSM allows you to focus on **ONE SITE AT A TIME** to accumulate enough credits so you can **SEND FROM THAT SITE**. Not only can you satisfy your **minimum clicks to unlock sending**, but you can get the credits you need to **send emails to the maximum allowed** per your member level.

TIP: Did you know... While you may have to click Solo ads and Credit mails to unlock sending, you get the **MOST CREDITS by viewing SuperSolos and Admin messages.** If you need to accumulate a lot of credits quickly, **VIEW SUPERSOLOS!** That's why Supersolos are Premium Paid Ads! They get **PRIORITY DELIVERY**, and **REWARD THE MOST CREDITS**. Hmmm... sounds like more reasons I LOVE SUPERSOLOS!

TIP: Pay attention to **HAPPY HOUR**, where you could be **earning 2x or 3x the credits** by viewing ads during to those times!

TIP: There is no affiliate program for MasterSafelistMails, but it is a **NICE FREE BONUS to GIVE AWAY to your referrals**. Even use it as a **LEAD MAGNET**. (I guarantee most amateur marketers don't know about it, even though it is on the safelist front page and the home page of every one of Dave's 300+ safelists! Nobody reads these pages!)

Master Safelist Mails is currently monitoring email at 309 websites.
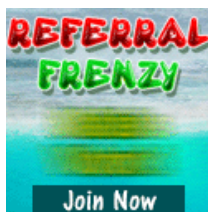

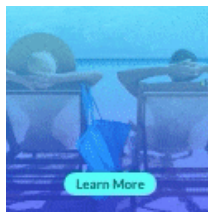

This message gives me a nice feeling:

You currently have monitoring enabled at 309 websites. You can add 0 more websites.

That means that I have **JOINED all 309 safelists** available in Master Safelist Mails, I have added them through the **Select Sites** screen, and I have updated them on the **My Sites** screen.

How I Use Master Safelist Mails to Send Emails

Today, I just want to send emails from **sites most likely to have solo ads available and credits to send credit mails**. I probably have more upgraded sites than most people, so I'm going to choose sites where I have the **highest membership levels** (VIP, Elite). Membership level is in the **Membership** column on **My Sites**. These sites get generous

monthly ad-packs, and the upper membership levels do not require clicking ads to send emails. Gold level and below sites still may require me to click a few ads for credits, so for today, I will skip over them.

I go down the list in **My Sites,** and choose the first site at **Elite** membership level, and login to the site simply by clicking the **Login** button. After getting through the OTOs and login offers, and viewing the Sponsor Login ad, I am presented with **my SPONSOR's page of textlinks**.

TIP: If YOU have referrals on a site, **take the time to post textlinks** because **your REFERRALS will be shown a screen exclusively of YOUR textlinks every time they login.**

TIP: To find out if you have referrals on a site, go to **MemberTools!ReferralTools.** A list of your referrals will be at the bottom of that page.

Because **VIP and Elite members have exclusive access to purchase and post Login Ads,** I always check to see if I have slots available, and **ensure the listed login ads are current**. All you see is a listing of URLs so, it only takes a minute to test each link. If I have available slots, or if I have **outstanding commissions on that site**, I **trade my commissions for login ad slots. THESE ARE VERY EFFECTIVE FULL PAGE ADS.** Because login ads can only be posted by VIP or Elite members, there is little competition for these ads in rotation (usually the only competition for rotation slots is the Admin).

TIP: If you have **accumulated commissions** on a safelist site, but you have not met the **$20 payout threshold** minimum, **trade those commissions for ads**. The most to least effective ads are **Login Ads** (VIP, Elite only), **HPSolo/Solo Ads**, **Credit Mail**, **Textlinks** (if you have referrals), Banners, buttons, surf sites.

I usually select **2-3 ads that I want as focus of my promotions** for the day. Using **ChatGPT**, I produce **3-5 subject lines** for each ad, and save them somewhere I can quickly access them, the ad body, and capture page URL.

TIP: Create a notepad file that contains the subject lines, ad body, and URL for today's ads. This makes it easy to copy/paste into the safelist forms to submit the ads.

TIP: I use a tool called **Jitbit Autotext** to create "shortcuts" (free for personal use). **This saves time** by not having to switch back and forth to copy/paste. For example, **Ad1 subject 1** would be **a1s1**, **ad 1 body 1** would be **a1b1**, **url** would be **a1u1**, etc. I just enter **a1s1** in the subject line field, **a1b1** in the ad body field, and **a1u1** in the URL field. Jitbit expands these shortcuts to the saved values.

I then set up my **HPSolo** and **Solo** ads (if available), then **Credit Mail**. I send a different ad for each, and I vary the subject lines from other sites where I send the same ads.

TIP: Use Trackers to determine the effectiveness of the ads you post.

Once I have entered today's **ACTIVE TRAFFIC ads** (I don't bother with banners, buttons, and surf sites, and only enter textlinks if I have referrals on that site), I close that browser tab, and go on to the next site in Master Safelist Mails **My Sites.**

TIP: PROMOTION is my MOST IMPORTANT ACTIVITY of the day! I only devote my time to **PRODUCTIVE ACTIVITIES**. When promoting, I don't respond to emails, non-relevant texts, or social media. Because **I track how many emails I send in a spreadsheet**, I know when I've met my promotion goals for the day. Everything beyond that is time I devote

to **CREATIVE ACTIVITIES**, and **ADMINISTRATIVE/MAINTENANCE** tasks for my business.

Worldprofit Weekly Friday Workshop

No Workshop this week due to worldwide Microsoft problems

George Kosch has been doing LIVE weekly Workshops for years, and posting the recordings on the Worldprofit YouTube Channel so that NON-MEMBERS and ASSOCIATES can view them.

Newsletter Archive

Do you like these newsletters?

I am making some changes. The newsletters I have posted looked fine as a single column, but on the blog site, the dual column format is terrible. I have re-posted all the past dual column newsletters as PDF files, and all in the future. You will see in the blog post only a link to open the PDF file.

Find an archive of recent newsletters on my blog, LifeBalanceB2B.com under heading Newsletters
