### MyIMPPartners Founder + AI Suite Going LIVE

Founders offer Ended but this is still a GREAT DEAL as a monthly, UNLIMITED Autoresponder and Marketing Tools.

**My IM Partners Pricing**

Membership Type	Max AR Subscribers	Access To AI Suite	Monthly Cost	Referral Commissions
Basic AR	15,000	N/A	\$14.95/mo	40%
Pro AR	30,000	N/A	\$29.95/mo	40%
Basic AI	0	Full Access	\$29.95/mo	40%
Pro AR-AI	30,000	Full Access	\$49.95/mo	40%

**ONLY 3 Slots Left for Optional Co-OP to GET GUARANTEED 5 PAID REFERRALS**

**Monthly Members Earn 40% Commission.** You do not need to be at higher membership level to paid for upgraded referrals. So, if you are a Basic AR member, if a referral upgrades to Pro AR-AI, you earn 40% of \$49.95 = **\$19.95 PER MONTH - NICE!**

**ROI** for a \$100 investment for the Co-Op at 40% commission would be 5 to 17 months. Promote it, and get more than 5 referrals, this is a **NO BRAINER**.

**Don't have \$100? Charge it on your CREDIT CARD** (not debit account) and actually **PAY** for those charges **NEXT YEAR**.

Since the **TRANSACTION** would be completed in 2024, it would be a **legitimate BUSINESS EXPENSE** that can **REDUCE THIS YEARS TAX LIABILITY** due on April 15th, 2025, or **INCREASE YOUR TAX REFUND**.

**TIP:** Autoresponder subscribers are historically **LONG TERM**.

Join [MyIMPartners HERE](#)

**Autoresponder monthly fee will start at \$14.95 for 15,000 subscribers.** Compare to SendShark 10,000 subscriber (Easy Commission Funnel rate) is \$25.00 per month. You can upgrade later to the 30,000 subscriber level if needed.

## First Look: What Tools Are Included with MyIMPPartners?

Naturally, MIP is a full function autoresponder. I've only had a short time to explore. The system is fairly complex, but if you understand the basics, it can provide everything you need. In simple terms...

- First, you need to create a **LIST**.
- Once your list is created, you create a **CAMPAIGN**.
- You add **autoresponder messages** to your campaign.
- You can then generate your **autoresponder HTML code**
- Use the **Landing Page Builder** to create your capture page. Subscribers will be added to the **LIST** when they respond on the **Capture Page** and verify their email (double opt-in)
- Once you have subscribers on your **LIST**, you can create **BROADCAST MESSAGES** that are emailed to each subscriber, or you can segment the broadcast by **GROUP**.

I'm still trying to figure out things like email templates, landing page templates, images, tags, etc. Not bad for a morning's work so far.

Safelist-based Marketing tools included are:

- **MyTop10** - displays 10 Button Ads on a page. Promote with a single unique URL. **MemberTools!My Top 10**
- **Affiliate Builder** - a Downline Builder **MemberTools!Affiliate Builder** at with 320 Sites to Join
  - If you have referrals, by updating this page with your referral URL for each site (not just your login ID), your Referrals at MIP will also become your referrals on THOSE SITES that you updated with your referral URL
- **Splashpage Builder** - Build flexible splash or lead capture pages at **MemberTools!Splashpage Builder**

## TIP: Check Your URL Rotators

When Dave Mosher's sites convert from **Peer2Peer Instant Commision sites** to Dave's latest **standard safelist script**, the **referral URL** using *index2.php* (the one that did not present an exit pop-up) will throw a **404 error**.

For instance, my referral URL was  
<https://commissionsunleashed.com/index2.php?r=richardmoyer>

Once the site converted, this URL failed. I had to **go to all instances** of my

referral URL and change it to

<https://commissionsunleashed.com/index.php?r=richardmoyer>

I have suggested a fix to Dave, but it may take some time to implement.

## **URL Rotators Require URL Checking and Maintenance**

You should periodically check your URLs within URL Rotators. If you have just a few to check, you can check them one-by-one, or even copy paste a few to bulk check with this free utility:

<https://httpstatus.io/>

You should see **200** buttons in **GREEN**. Take action of those that do not pass.

**TIP: Common Causes for URL Failure.** Check **https://** vs **http://**. Just about everything is converting to **SSL** due to European regulations, so **https:// is most likely required**

---

## **Using SHEETS to Clean a List of URLs**

If you have **LOTS of URLs** (like I do in my URL Rotators), the URLs may be in a **TABLE**.

I copy the **DATA** I want from that table by clicking **before the first data element on the first row of data**, holding the **SHIFT** key, then **clicking AFTER the last data element**, then **Ctrl+c** (or right-click, then **Copy** from pop-up context menu).

I open a clean spreadsheet in **Google SHEETS**, then click in cell **A1**. **Ctrl+v** (or right-click **Paste** from the context menu). This will paste the **LINKS** to your data into SHEETS.

Select All (**Ctrl+a**)

Delete data from all columns except the one containing your URLs.

**Select the whole column** by clicking on the **LETTER** in the column header (ie **A** for **Column A**)

**Right Click** on the **Column Header** (ie **A**) and select **View More Column Actions** from the bottom of the context menu, then click **Remove Link**

You should now be able to Select All (**Ctrl+a**) and copy (**Ctrl+c**), then paste (**Ctrl+v**) into

<https://httpstatus.io/>
